Portfolio | LinkedIn | GitHub | LeetCode

Education

- **Bangladesh University of Engineering and Technology** *2022 – June 2026, CGPA: 3.3164/4.00*
  Bachelor of Science in CSE Dhaka, Bangladesh

Research

- **Age-Aware Neurological Gait Pattern Discovery from Biomechanical Signals: Multi-Phase Stroke Severity Analysis** *2025 – 2026*
  Undergraduate Thesis (defended) | Supervisor: Mahmuda Naznin, Dept. of CSE, BUET Dhaka, Bangladesh
  - An **age-normative framework** for uncovering neurological relations from biomechanical gait features.
- **Reinforcement Learning for Reliable and Security-Aware LLM Agents (Ongoing)** *2026 – Present*
  Supervisor: Md. Rizwan Parvez, QCRI Research Institute Doha, Qatar
  - Investigating reinforcement learning-based optimization to enhance the reliability and accuracy of function calling behavior in large language models for complex tool-use scenarios.
  - Exploring reinforcement learning techniques for developing security-aware agentic systems capable of secure reasoning, vulnerability analysis, and autonomous decision making in software repositories.

Projects

- **HealthSync** *2025*
  Spring Boot, React, PostgreSQL, Firebase GitHub
  - Developed a comprehensive healthcare platform connecting patients and doctors with appointment scheduling, digital prescription management, and medical history tracking.
- **Arxiv Research Paper RAG System** *2026*
  Python, SQL, SQLite, FastAPI, ChromaDB, Data Analysis GitHub
  - Built an end-to-end **data pipeline** for ingesting, cleaning, and analyzing arXiv research paper data using Python and SQL.
  - Developed a **RAG-based API system** using FastAPI and ChromaDB for semantic retrieval and question answering.
- **Enhanced xv6-riscv Kernel** *2024*
  C, Assembly, Makefile GitHub
  - Implemented an **MLFQ scheduler** with aging and added **kernel-level threading** support.
  - Added custom system calls (trace, sysinfo) and a Bash autograder for testing.
- **Mini C Compiler** *2024*
  CSE-310 Compiler Design, C, 8086 Assembly GitHub
  - Built a **mini C compiler** from scratch in four phases: Symbol Table, Lexical Analysis, Semantic Analysis, and Intermediate Code Generation.
  - Generated **8086 assembly** as intermediate output to validate end-to-end compilation workflow.

Achievements

- **5th Place —Tech Career Hunt 2.0**, organized by Shohoj Coding. *May 2026*
- **Internship Selection at Save the Children —**AI/ML Track Finalist in their Hackathon.

Skills

- **Research Interests:** Cyber-Physical Systems, Systems Security, Software Security, Trustworthy AI, AI Security Operating Systems, Reinforcement Learning,LLMs
- **Programming:** Python, C++, C, Java, JavaScript | **Databases:** MySQL, PostgreSQL, MongoDB
- **ML/AI:** PyTorch, TensorFlow, Keras, Scikit-learn, NumPy, Pandas, OpenCV, LLMs, vLLM
- **Tools:** Git, Docker, Linux | **Frontend:** React, Next.js, Material-UI

Relevant Coursework

- **Relevant Coursework** Data Structure, Algorithm, Computer Networks, Database Management System, Compiler Design, Operating System, Software Engineering, Artificial Intelligence, Machine Learning, Computer Architecture, Theory of Computation, Computer Graphics

Additional Information

Languages: English, Bengali. **Interests:** Photography, Traveling, Badminton, Cycling.
